

Chief's **F.A.S.T.**® Anchoring System Now Has More Capabilities!

Get the job done with **lightning speed**

Part No. 200033

The *F.A.S.T.* Anchoring System accommodates the majority of today's pickup trucks, sport utility vehicles and full frame cars, making it easier to measure vehicles with greater precision. Because of the system's technician-friendly use and ease of setup, repairs are uncomplicated and simple. Pulling and measuring time is reduced and technicians only need to level the vehicle to go to work.

The F.A.S.T. Anchoring System

F.A.S.T. Upgrade Package

Chief's **F.A.S.T. Upgrade Package** (Part No. 200030) allows technicians to enhance their existing F.A.S.T. Anchoring System while increasing shop productivity.

Optional Accessories

Three Inch Riser Bars (Part No. 539541) are used when anchoring setups require additional height and may be stacked two high in some applications.

Narrow Rail Vise Attachments (Part No. 539337) slender design is used to secure box-shaped frame rails when frame rail access is limited.

Turnbuckle Assists (Part No. 539630) feature a cylindrical center unit with adjustable hooks at each end providing excellent support for anchoring assemblies.

Tie Back Brackets (Part No. 539539) fit between anchoring attachments and Riser Bars in tall anchoring applications.

Increase productivity F.A.S.T.

- A fast set-up time means increased productivity.
- Adaptability to all Chief pulling racks and most other frame straightening systems makes F.A.S.T. the most versatile anchoring system on the market today.
- The F.A.S.T. system is technician friendly — easy to use and easy to understand.
- F.A.S.T. isolates the vehicle frame from its suspension, making repair diagnosis simple.
- F.A.S.T. mounts to Chief's patented Universal Anchoring Stands or to Universal Measuring System Pinch Weld Stands, providing a secure hold on vehicle's structural components.
